DETAILED ACTION

This communication is responsive to RCA filed on March 22, 2004. The amendment has been entered.

Claims 1-21 are pending.

Specification

1. The amendment filed on July 24, 2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "and another is the Synchronous Digital Hierarchy (SDH) Standard used in Europe that has many similarities and is generally equivalent to SONET".

Applicant is required to cancel the new matter in the reply to this Office Action, including claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one

Application/Control Number: 09/658,778

Art Unit: 2662

skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The new subject matter in the claims is the introduction of SDH (Synchronous Digital Hierarchy).

Response to Arguments

2. Applicant's arguments, see pages 10-15, filed March 22, 2004, with respect to Chan et al, US (6,301,254) and bison, US (6,349,092) have been fully considered and are persuasive. The rejection of claims 1-15 under Chan or Chan/Bisson has been withdrawn.

However, Examiner has maintained the 112 1st Paragraph. See remarks below.

112 1st rejections:

Applicant argued that the introduction into the specification and the claims (1-21) of SDH (synchronous digital hierarchy) is not new matter, stating that SONET and SDH are generally equivalent. Applicant further referred to MPEP §2163.07. Examiner respectfully notes that the issue is the introduction of a "new matter" in the specification because the introduction of SDH in the spec and the claims is not a mere rephrasing or rewording of a passage. The issue of new matter is that the specification as originally filed does not posses the "SDH" as been introduced in the spec and claims. More importantly, the specification does not describe the SDH frames and how they are related to the SDH logical channels, and the difference or the commonality between the logical channels of the SONET frames and the SDH frames, etc... Examiner believe

Art Unit: 2662

that the introduction of the Synchronous Digital Hierarchy into the specification and the introduction of the SDH frames and logical channels as well as the related protection mechanism in the claims represent a clear introduction of new subject matter. Applicant is kindly required to cancel the new subject matter from both the specification and the claims in response to this office action.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to AHMED ELALLAM whose telephone number is (703) 308-6069. The examiner can normally be reached on 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kizou Hassan can be reached on (703) 305-4744. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
